How to choose

KSK

Rubber Dam Clamps

76 types × 3 colors

Features of KSK Rubber Dam Clamps

- KSK DENTECH Rubber Dam Clamps are made of special spring tempered stainless steel .
- This material has ideal spring action for rubber dam clamps , as well as maximum corrosion resistance .
- Various types are available, so you can choose clamps in accordance with the teeth .
- Metal fatigue test is conducted for every production to assure good spring action and long-term use .
- For stable forms, our craftsmen adjust bending clamps one by one manually.
- All beaks are sharpening , so good to fit to the teeth .
- "BLACK" and "MATT" avoid eye fatigue of dentists by reflecting operation light .
- All clamps are made in Japan.

Rubber Dam Complete Set

- Contents :
- ① Clamp set No.12
 - ② Rubber Dam Frame, Adult
 - ③ KSK Rubber Dam Punch
 - ④ KSK Rubber Dam Clamp Forceps & Sterilization Cassette L

Rubber Dam Starter Kit

- Contents :
- ① Clamp set No.12
 - ② Rubber Dam Frame, Adult
 - ③ KSK Rubber Dam Punch
 - ④ KSK Rubber Dam Clamp Forceps
 - ⑤ Rubber Dam Template.
 - ⑥ KSK Dental Dam Non-Latex (20 sheets).

For permanent teeth

3 Colors

42 43
wingless

For upper left molars with flat beaks, paired with 43.
For upper right molars with flat beaks, paired with 42.

9T 2A 2AT
winged

Most popular anterior clamps.
Similar to #2, but with larger beaks. For bigger bicuspid.
Similar to #2T with larger beaks. For bigger bicuspid.

44 212 29
wingless

For anteriors, canines and cavities on bicuspid labial.
Cervical clamp for labial cavities.
For upper & lower bicuspid, broad beaks for wider view.

9T 210 212 90N
winged wingless

Most popular anterior clamps.
For centrals.
Cervical clamp for labial cavities.
Strong anterior clamp.

6 9 44 212SA
winged wingless

For anteriors.
Most popular anterior clamp.
For anteriors, canines and cavities on bicuspid labial.
Similar to #212 but little stronger pressure on gingival.

208 207 206 1T 22 27 29 Y10
winged wingless

The figure is little bigger than #207. For big bicuspid.
For upper & lower bicuspid with flat beaks.
For upper & lower bicuspid with festooned beaks.
For roots deep festooned serrated beaks.
Similar to #207 but wingless.
Similar to #206, but wingless, festooned beaks.
For upper & lower bicuspid, broad beaks for wider view.
For Premolar, deep festooned beaks grab subgingival part.

4 205 5 8A 201 14 14T 51 26 W8A U67 18
winged wingless

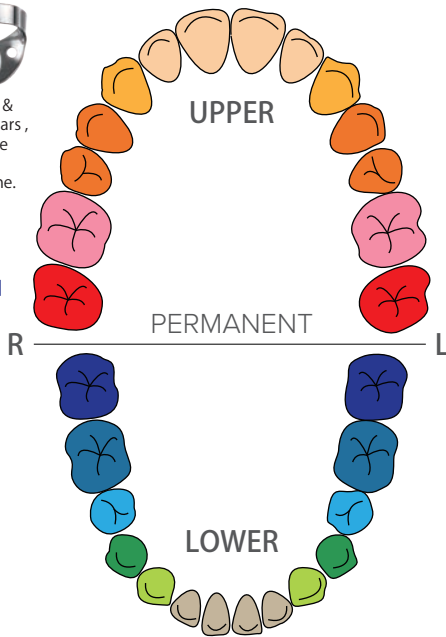

Similar to #3, but with festooned beaks.
For upper molars with stiff spring.
For upper molars.
For upper roots with deeply festooned beaks.
Similar to #7 but with festooned beaks.
For partially erupted molars.
For partially erupted molars.
For root furcation. Can press down the gingiva.
For upper molars especially for erupted tooth.
Similar to #8A, but wingless.
For upper second molars. compact size.
For upper & lower molars, round type beak for cervical line.

DISTAL 56T 14T 3 51 31 30 25 W8A 18
winged wingless

For molars, to reach distal part of molar.
For lower molars with festooned beaks.
For half erupted molars.
For small molars, flat beaks.
For root furcation. Can press down the gingiva.
For beaked molars. For lower furcation of subgingival. #31 and #30 are pair.
For deep buccal cavities of molars, wider fringe of buccal side. Paired with #24.
Similar to #8A, but wingless.
For upper & lower molars, round type beak for cervical line.

1 1T 1A 1AT 22 27 W2A 203 204 202 201
winged wingless winged

For roots, deep festooned beaks.
For roots deep festooned serrated beaks.
For cervical cavities of bicuspid with festooned beaks.
For subgingival cavities of bicuspid.
Similar to #207 but wingless.
Similar to #206, but wingless, festooned beaks.
Similar to #2A, but wingless.
For small lower molars right. Paired with #204.
For small lower molars left. Paired with #203.
For large molar clamp, similar to #7, but with larger beaks.
Similar to #7 but with festooned beaks.

207 208 2A 2AT
winged

For upper & lower bicuspid with flat beaks.
For big bicuspid. The fringe is little bigger than #207.
Similar to #2, but with larger beaks. For bicuspid.
Similar to #2T but with larger beaks. For bicuspid.

9T 2 2T 212 22 44
winged wingless wingless

Most popular anterior clamps.
For lower bicuspid with flat beaks.
For lower bicuspid with flat serrated-beaks.
Cervical clamp for labial cavities.
Similar to #207 but wingless.
For anteriors, canines and cavities on bicuspid labial.

9T 44 212
winged wingless

Most popular anterior clamps.
For anteriors, canines and cavities on bicuspid labial.
Cervical clamps for labial cavities.

205 5 8A 201 14A 4 8 28 24 42 43
winged wingless

For upper molars with stiff spring.
For upper molars.
For upper roots with deeply festooned beaks.
Similar to #7 but with festooned beaks.
Similar to #14, but with larger beaks.
Similar to #3, but with festooned beaks.
For upper molars same size with #7. Suitable for cervical part.
For upper - lower molars. very wide fringe for wider view.
For upper - lower molars. wider fringe of buccal side. Paired with #25.
For upper left molars with flat beaks, paired with 43.
For upper right molars with flat beaks, paired with 42.

202 14 56 7 W3 31 30 28 25 15
winged wingless

For large molar clamp, similar to #7, but with larger beaks.
For half erupted molars.
Similar to #5, but with festooned beaks.
For lower molars with flat beaks.
Similar to #3, but wingless.
For beaked molars. For lower furcation of subgingival. #31 and #30 are pair.
For upper - lower molars. very wide fringe for wider view.
For deep buccal cavities of molars, with wider fringe of buccal side.
For big lower molars, with longer beak strong spring.

7A 14A 56A 14T 56T 2T 2A 2AT 1 1T 1A 1AT
winged winged winged

For very big lower molars with flat beaks.
One size larger than #14.
For large lower molars, similar to 56, but with larger beaks.
For partially erupted molars.
For lower molars with festooned beaks.
For lower bicuspid with flat serrated-beaks.
Similar to #2, but with larger beaks. For bicuspid.
Similar to #2T but larger beaks. For bicuspid.
For roots, deep festooned beaks.
For roots deep festooned serrated-beaks.
For cervical cavities of bicuspid with festooned beak.
For subgingival cavities of bicuspid.

29 22 27 W2A Y10 207 209 0 00
wingless winged

For upper & lower bicuspid, broad beaks for wider view.
Similar to #207 but wingless.
Similar to #206, but wingless, festooned beaks.
Similar to #2A, but wingless.
For Premolar, deep festooned beaks grab subgingival part.
For upper & lower bicuspid with flat beaks.
For lower bicuspid with flat beaks.
For small bicuspid and pedo central.
Smaller than #0. Available for anteriors.
